

Problem:

If a user creates a user group (i.e. is the owner/creator of the user group), he cannot add this user group (give permissions) to his own surveys.

However, other members of this user group can add the user group to their own surveys [intended behavior], so the problem affects only the owner/creator.

- 1) I create a new user group called „Testgruppe Robin“. As shown, it has 0 members, so my own account is not considered a “member” of my own group.

My Nutzergruppen

Aktionen	Benutzergruppe ID	Name	Beschreibung	Eigentümer	Mitglieder
   	8	Testgruppe Robin		r.gleeson	0

- 2) This is in contradiction to the manual, where it is shown that the owner/creator should be automatically added to the user group:

Hint: You can see in the example below that the owner/creator of the user group is automatically added to his/her own user group.

Group members		
Group description: Professors (University X) - permission to see and export the results of the survey X		
User added.		
Action	Username	Email
	admin	your-email@example.net
	Username_1	test@example.com
	Username_2	test@example.com

- 3) As shown here, my account r.gleeson is not listed as a group member, but I have now added two test users (a.test and u.test):

Gruppenmitglieder

Aktion	Benutzername	E-Mail
	a.test	robin.gleeson@univie.ac.at
	u.test	robin.gleeson@univie.ac.at

- 4) As shown below, I cannot add my own user group “Testgruppe Robin” to my own surveys, but I can add the user group “advanced Testgruppe” to my own surveys, as I am not the owner/creator of “advanced Testgruppe”, merely a member.

User group list

[+ Add user group](#) [◀ Back](#)

My user groups

Actions	User group ID	Name	Description	Owner	Members
   	8	Testgruppe Robin	Testgruppe von Robin	r.gleeson	2

Displaying 1-2 of 2 result(s).
10 rows per page

Groups to which I belong

User group ID	Name	Description	Owner	Members
3	advanced Testgruppe		a.test	2

Displaying 1-1 of 1 result(s).
10 rows per page

Survey permissions

User: [Add user](#)

User group: [Add group users](#)

advanced Testgruppe

- 5) However, users u.test and a.test can add the user group “Testgruppe Robin” to their own surveys, only my user as owner/creator cannot do this with his self-created group.

6) I have given full user group permissions. All other accounts with user group privileges experience the same problem.

	Permission	General	Create	View/read	Update	Delete	Import	Export
 Permission to create, view, update and delete user groups	User groups	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
 Permission to create, view, update and delete users	Users	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
