

Survey uses the following additional token attributes:

- PRIMARY ADDRESS
- CITY
- STATE
- PRIMARY PHONE
- EVENT TYPE
- ZIP

Here's a portion of the token record. The ZIP attribute holds a zipcode.

PRIMARY A	CITY	STATE	PRIMARY P	EVENT TYP	ZIP
123 WEST MAIN	LITTLE ROCK	Arkansas	5016867000	31	00123

When the instrument is launched, the value stored in the ZIP attribute is changed from **00123** to **83**.

FIRST NAME	LAST NAME	ADDRESS	CITY	STATE	PHONE	EMAIL	ZIP
Test	NCS	123 WEST MAIN STREET	LITTLE ROCK	Arkansas	5016867000	myemail@email.org	83

I used this expression to display the Zip value. If the question ZIP is empty, then the value store in the token attribute ZIP is displayed.

```
{if(is_empty(ZIP.shown), TOKEN:ATTRIBUTE_6, ZIP.shown)}
```
