

Dynamic Test Group

....

- ❗ Only numbers may be entered in these fields.
- ❗ Each answer must be between 0 and 100

Tax rate

0 100

Person 1 $x=5+(100-\text{sliderVal})*5/100$

Person 2 $y=(5*\text{sliderVal})/100$

I want the values of variables x and y to be shown according to the corresponding equations

The image shows a dynamic test group interface. At the top, there are two instructions: 'Only numbers may be entered in these fields.' and 'Each answer must be between 0 and 100'. Below these is a slider labeled 'Tax rate' with a range from 0 to 100. Underneath the slider, there are two equations: 'Person 1' with the equation $x=5+(100-\text{sliderVal})*5/100$ and 'Person 2' with the equation $y=(5*\text{sliderVal})/100$. An arrow points from the equations to a text box that says 'I want the values of variables x and y to be shown according to the corresponding equations'.
