At the beginning of the survey, the user selects one of the options below –

Q1 What Maturity Level would you like to certify for?				
Level 1	Level 2	Level 3	Level 4	Level 5
○	○	○	○	○

Code	Answer options
L1	Level 1
L2	Level 2
L3	Level 3
L4	Level 4
L5	Level 5

On question 4, I have the following equation set to only display the question if 'Level 1' was selected on question 1. But this is not working

Relevance equation:

{ `Q1=="L1"` }
